

Welcome to Re-CCI - Rethinking Cultural & Creative Industries through digital and entrepreneurial competencies

The creative and cultural industries, as a pillar and catalyst for sustainability, have a direct and indirect impact on the economic and humanitarian development of EU countries.

The aim of the project is to train CCI's employees in a range of necessary hard & soft skills that can meet modern professional needs (e.g. business thinking, digital skills, networking etc.) and to provide them immediately and effectively with the appropriate tools taking into account the specifics of the cultural sector in general as well as the individual needs of each sector in particular. The "Rethinking Cultural & Creative Industries" project will be an accelerator in the transmission of new knowledge and the acquisition of digital and business skills for workers in the creative and cultural sectors. Its purpose is to be an example of good practice in culture in relation to the effective and immediate response to crises and transitions in an era identified with the rapid speed of change in all aspects of human activity.

Meet the partnership

Discover PR1 –Competency Framework for Cultural & Creative Industries in the 21st - century post - pandemic scenario

During the first 6 months of the project, the partnership, guided by Bizrupt, developed a Competency Framework for CCIs in the 21st century post pandemic scenario.

The result was developed after a desk research on EU best practices, a survey filled by 120 European CCIs professionals and organizations, qualitative interviews with experts.

The framework is based and connected with EC competences frameworks Entrecomp, DigComp and LifeComp

The final result is available on the website at the link:
